Electronic Water Leveller

Take the easy option and fill your pool with the Water Witch electronic water leveller. The Water Witch lets you relax and enjoy your pool by keeping it full at all times.

- ✔ Fills your pool automatically
- ✔ You can relax and enjoy your pool
- ✔ Protects your pump and pool equipment
- ✔ Hidden from view so it looks great
- ✔ Reliable, durable and efficient
- ✔ Designed and manufactured in Australia

# How Does it Work?

Do you want to spend your spare time filling your pool with a garden hose? Of course not. Let the Water Witch do the work for you.

The Water Witch electronic water leveller is Australia's most trusted automatic leveller. It protects expensive equipment by continuously monitoring the water level in your pool to ensure it doesn't drop low or overflow.

The Water Witch is used in pools, ponds, tanks and other applications where the water level must be maintained. It is designed and manufactured in Australia for Australian conditions and is also exported to Europe, Asia and the USA.

Filling your pool has never been so easy!

*“The easiest and most reliable way to keep your pool full.”*

I'm glad we followed our pool builder's advice and installed the Water Witch. We never need to think about filling the pool, even when we go away!

The best part is we never need to put ugly hoses into our pool and keep watching them. We wanted our pool area to look great and it does thanks to the Water Witch!
