

QuikClean is all about you.

Your new pool should be everything you want it to be. It should suit your lifestyle, your expectations and your preference for features such as energy efficiency and automation, as well as being a stylish and exciting addition to your backyard.

QuikClean is the first in-floor cleaning system which can be designed and tailored to suit your exact needs. We have three distinct systems with a range of features designed to appeal to your unique expectations, personality and site requirements.

We proudly offer you the flexibility of choice so your new self-cleaning pool is exactly what you want it to be. Remember, with QuikClean, it's all about you.

QuikClean is all about you.
Your pool, your lifestyle, YOU.

There is a QuikClean colour just for you. Our cleaning heads and AVSC drains are available in six stylish colours to match the interior finish of your new pool.

Compare features to decide which QuikClean system is best suited to you.

Safety

We understand nothing is more important to you than family. Don't worry, we feel the same. All QuikClean components are completely safe and comply with the most rigorous Australian and international standards to ensure your pool is always a fun and safe space. You can enjoy your pool knowing your family will always be safe with a QuikClean system.

Backed by family values

The QuikClean range of advanced in-floor cleaning systems is proudly brought to you by Cooke Industries, a long-standing business founded on true family values. Visit us online to learn more about QuikClean and the options which will help make your new pool a pleasure to own.

Quality and reliability

We believe you deserve the very best in-floor cleaning system for your new pool and we continue to invest in research and development to ensure we deliver on our promise of absolute quality.

All QuikClean components are manufactured in the USA for consistent quality, durability and unrivalled performance. QuikClean systems are an outstanding long-term investment because they're backed by extensive warranties across all components, including a lifetime warranty for the cleaning heads.

Value and power in abundance!

A pool isn't clean unless it's well-circulated.

A QuikClean in-floor cleaning system is your invitation to a self-cleaning, easy maintenance pool with amazing water quality.

The key to maintaining pristine, clear, and healthy pool water is an effective cleaning and circulation system. QuikClean sanitises, eliminates cold pockets, reduces heat loss, and ensures an even dispersment of chemicals—all by itself. This means more time saved, more money saved, and more of your life spent enjoying your pool.

Conventional systems only move water at the surface, creating cold spots and poor circulation and sanitisation.

QuikClean systems efficiently distribute clean, heated water evenly for a fully enjoyable experience.

QuikClean systems use a series of strategically positioned cleaning heads on your pool floor, steps, and benches to circulate water to clean your pool and remove debris with their programmed, 360° rotation. These heads are completely safe and virtually invisible because they fully retract into your pool floor when not in use.

Cleaning heads and drains are available in several colours to match the interior finish of your pool.

Flexibility and robust performance!

Experience an effortlessly healthy pool.

Cleaning and circulation of your pool is further enhanced in a QuikClean Plus system by adding the QuikSkim venturi skimmer.

Instead of using the suction power of an additional pump, QuikSkim uses just 20-30 l/min of return-side water to generate a skimming action equal to 300 l/min. QuikSkim is the only skimmer that can fully exploit the potential of variable speed pumps and genuinely reduce your power costs.

Flexible, safe and effective debris removal.

Choose the drain that suits your style. QuikClean and QuikClean Plus systems can be designed in a variety of configurations using the standard PDR2 drain or you can upgrade to the AVSC drain featured in the QuikClean Xtreme system. All options provide effective debris removal and absolute safety for your family.

Stylish, powerful and efficient cleaning!

Benefit from genuine energy efficiency.

Superior cleaning power with less energy.

Discover the joy and ease of a self-cleaning pool that is more powerful and more efficient than any other. With its exclusive venturi-powered cleaning heads, QuikClean Xtreme is the only system purposely designed for variable speed pumps, meaning you benefit from additional power and superior cleaning whilst using less energy.

Incomparable style.

QuikClean Xtreme is a class above the rest. Its advanced venturi technology means you'll need less cleaning heads in your pool and the impressive AVSC drain features an optional tile/pebble lid so it blends seamlessly with your pool interior.

QuikClean is all about you. Good for your pool, the environment, and your wallet - with virtually no effort to maintain.

Improves water circulation for a cleaner, healthier and more enjoyable pool.

Reduces treatment costs by dispersing chemicals more efficiently.

Introduces water at the pool floor to lower heating costs and balance water temperature.

Upgrade to a QuikClean Plus system and combine with a variable speed pump to significantly reduce energy costs.

Upgrade to a QuikClean Xtreme system to achieve a more stylish look and enjoy the world's most powerful and efficient in-floor cleaning and circulation system.

23%
