A man, an idea, and a garden shed.

Ever since I started building pools in 1978, I've had a vision of bringing quality solutions to the Australian pool industry.

Cooke Industries was born after many years of tinkering with product prototypes in my backyard.

Grounded in a culture of exceptional service and dependability, Cooke Industries' mission is to make pool ownership a more relaxing and enjoyable experience.

Our pride lies in our commitment to providing a range of innovative products and energy-efficient pool systems that are designed to meet the needs of consumers today, and well into the future.

This year we launch our first ever product catalogue. Whether you're a homeowner, retailer, seasoned builder or a newcomer to the industry, we invite you to explore our handpicked selection of quality products.

Trust in over 40 years of pool industry experience. You're getting the best with Cooke Industries.

Thank you.

A handwritten signature in black ink that reads "Cliff Cooke". The signature is fluid and cursive, with a long horizontal stroke at the beginning.

Cliff Cooke, Managing Director

Great circulation and cheap to run?

Yes, it's possible!

Enhance your pool's skimming and circulation while saving hundreds of dollars every year.

Effortless

Easy pool ownership with powerful skimming

Economical

Lower running costs and reduced energy consumption

Circulation

Improves pool water heating and sanitation

Proudly brought to you by

SANITATION

POOL LAB[®]

Clean Clear Chlorination

Harness powerful automation and precision sanitation with chlorinator systems from Pool Power.

www.poolpower.com.au

Chlorinating Cell

safe and long-lasting

The patented design of the Pool Lab cell prevents production of hydrogen gas, ensuring your plant room is operationally safe. The cell is self-cleaning and can be replaced modularly at end of life.

Cells come in various sizes to suit the volume of your project, and are included with all Pool Lab Classic, Plus and Max systems.

Control Panel

easy and accurate system configuration

Built from heavy-duty materials for either outside or inside installation, the control panel is the brains behind Pool Lab systems.

Simple to operate and packed with features including diagnostics, internal save state for power failures, and pump burnout protection.
