Great circulation and cost effective?

Yes, it's possible!

Enhance your pool's
skimming and
circulation while
saving hundreds of
dollars every year.

Effortless

Easy pool ownership
with powerful
skimming

Economical

Lower running costs
and reduced energy
consumption

Circulation

Improves pool
water heating and
sanitation

Proudly brought to you by

AVSC[®] HEAVY DEBRIS REMOVAL

Among the most attractive, safe, and efficient drain options on the market.

The AVSC is VGB-approved as an unblockable drain. Internationally established as the benchmark for pool safety, it's the ideal choice for you and your family.

Available as single or dual suction models for added flexibility.

The AVSC Pebble Lid can be tiled or rendered to seamlessly blend with your pool's interior for a near invisible appearance.

DEBRIS REMOVAL

Photo courtesy of Pools of Distinction

LeafVac®

DEBRIS CONTAINMENT

Energy-efficient, durable, and easy to use, the LeafVac saves you time and money.

The extra-large canister holds more debris, ensuring more time between cleaning cycles. This increased capacity also allows for the free flow of water, shielding your pool’s pump from potential damage.

Moulded with UV-protected materials to withstand the most severe climates and stresses, the LeafVac is perfect for use in any Australian climate.

Simple to operate, the basket can be easily removed, emptied, and replaced, making pool maintenance a breeze.

Stylish and Practical!

V-LOCK's unique locking system provides superior safety for pool owners and simplifies Australian standards compliance for pool builders.

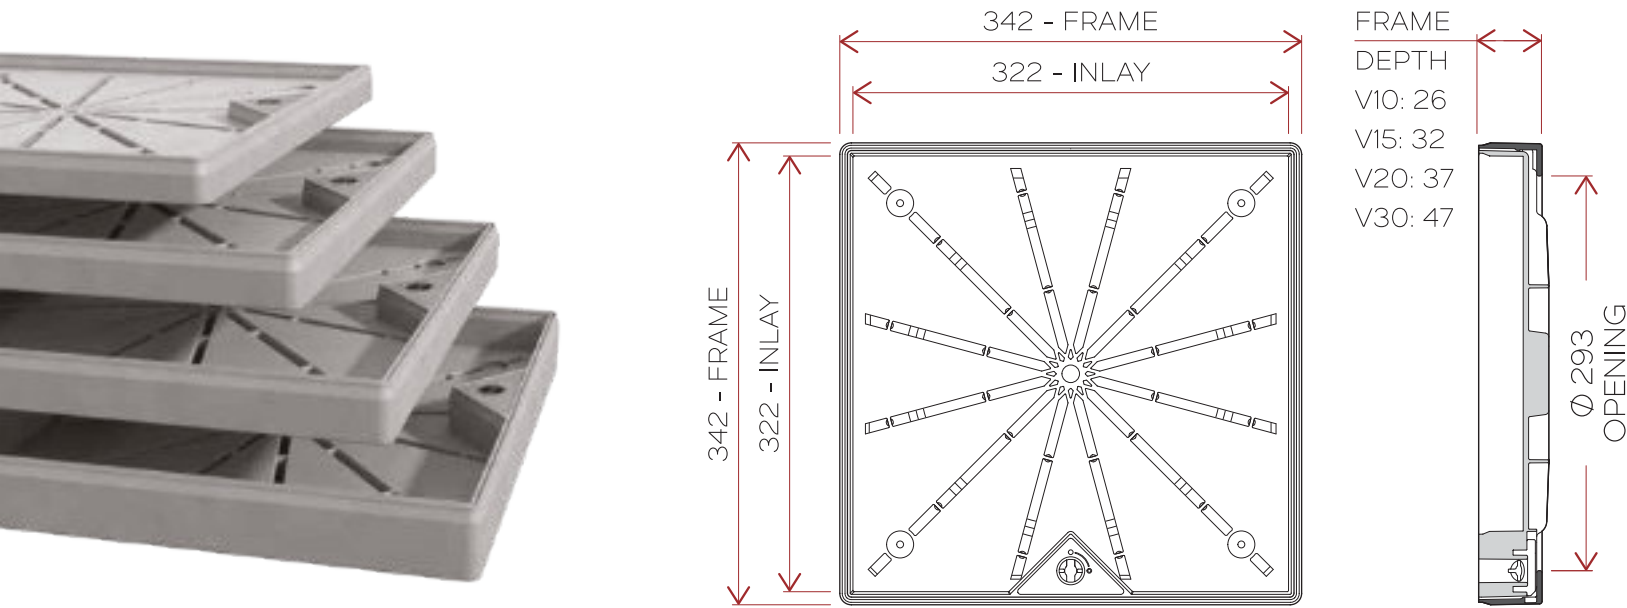

The flush-fitting lid is easy to install and blends into the pool surrounds for a flawless finish every time. With a range of models to choose from, V-LOCK is the perfect solution for tile, stone and timber deck finishes.

Manufactured using advanced engineering polymers, V-LOCK delivers superior strength, rigidity and weatherability without the need for electrical bonding!
