

PURASHIELD[®]

UV + OZONE SANITISER

Enjoy safer, cleaner and clearer water.

The PuraShield[®] UV +Ozone sanitiser employs the antimicrobial properties of ultraviolet light (UV) and ozone (O₃) to enhance your existing water sanitisation system and reduce chlorine usage by up to 50%.

Eliminate organic matter and pathogens safely and automatically by harnessing powerful precision-engineered technology.

PuraShield[®] by Pentair – the next level in swimming pool protection.

Keep uninvited guests out of your pool.

Against common waterborne pathogens including Cryptosporidium, Giardia and E. coli.

KEY FEATURES

Digital countdown timer and lifetime meter

Complete ozone regulation

Glow-through sight glass to check system operation

Multi-way connectors

How PuraShield® UV +Ozone Works

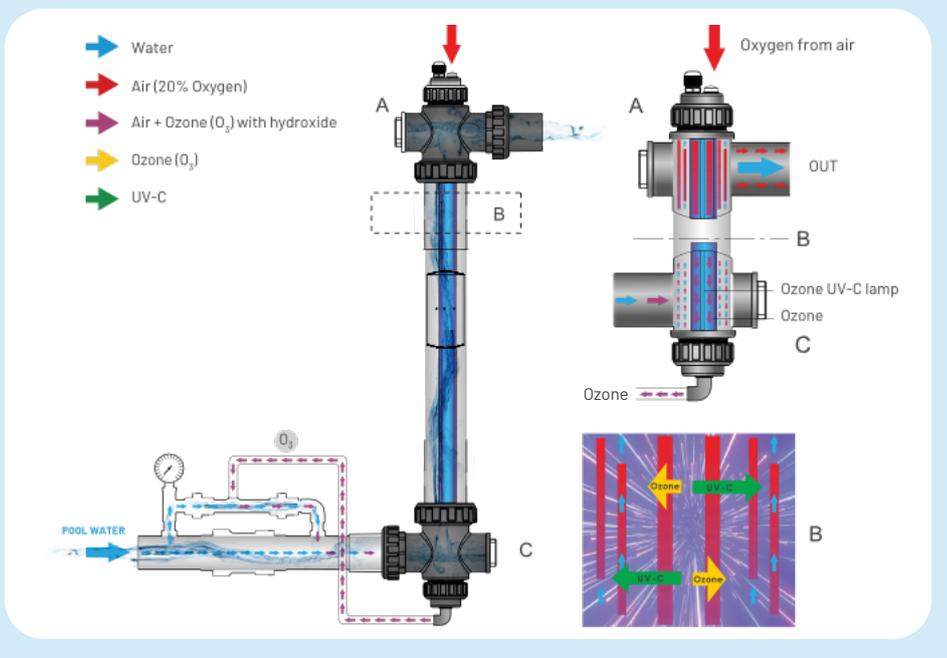

PuraShield® UV & +Ozone systems contain a special high-intensity ultraviolet lamp which emits two UV wavelengths:

254 nm deactivates the genetic material of bacteria, viruses and other pathogens.

185 nm converts oxygen from the air into ozone.

Ozone is dispensed into the water stream by the Venturi effect.

Ultraviolet light and ozone work effectively to neutralise chlorine-resistant waterborne pathogens, and can also break down organic compounds present in urine, sweat, cosmetics and sunscreens.
